## **DEMOLITION AND RELOCATION OF STRUCTURES IN HISTORIC DISTRICTS**

### **300. General**

These rules are adopted pursuant to the authority of the Howard County Code, Title II “Administrative Procedures,” Subtitle I “Administrative Procedures Act,” to guide the Historic District Commission in review of proposals to demolish or relocate structures in historic districts.

Demolition or relocation of any structure in an historic district requires a Certificate of Approval. The Certificate of Approval must include a plan for treatment of the site after the structure is removed. The Certificate of Approval must also include the new location for a relocated building if the location is within an historic district in Howard County.

### **301. Contents of Application**

An application for demolition or relocation shall include the following in addition to the information required for all applications for Certificates of Approval:

- A. Specific reasons for the demolition or relocation.
- B. Documentary evidence that supports the demolition or relocation request. Evidence may include reports on the condition of the structure; cost estimates for demolishing, relocating, repairing or stabilizing the structure; documentation showing that the structure does not contribute to the historic character of the district; or other information as needed for the particular application.
- C. Clear photographs of the structure.
- D. Site plans drawn to scale showing the structure proposed to be removed, other nearby site improvements, and proposed treatment after removal.
- E. For relocation of an historic structure, a detailed description of the methods of relocating the structure and the site to which the structure will be relocated must be provided.

### **302. Classification of Structure**

Before acting on an application for demolition or relocation, the Commission shall determine whether the structure is a Structure of Unusual Importance.

- A. Structures of Unusual Importance are structures deemed by the Commission to be of unusual importance to the Nation, State or County, whose loss would cause great

damage to the character and integrity of the historic district.

- B. Determination that a structure is a Structure of Unusual Importance shall be based on criteria in its adopted guidelines, the testimony of expert witnesses or other documentary evidence presented to the Commission.

### **303. Demolition of Structures of Unusual Importance**

- A. At a meeting on a request for demolition within the Historic District, the Commission must determine whether the structure is a Structure of Unusual Importance based on the testimony presented at the meeting and the information provided to the Commission by its Staff.
- B. If the Commission determines the structure is a Structure of Unusual Importance, the following applies:
  - 1. The Commission may deny the application unless:
    - a. The structure is a deterrent to a major improvement program which will be of substantial benefit to the County; or
    - b. Retention of the structure would cause undue financial hardship to the owner; or
    - c. Retention of the structure would not be in the interest of a majority of the persons in the community.
  - 2. The burden of proof is on the applicant to establish that one of the conditions cited in Rule 303.B.1 applies.
  - 3. If the applicant relies on Rule 303.B.1.b in order to meet the burden of establishing the need for demolition, the applicant must present documentary evidence of the cost of maintaining or relocating the structure, the estimated cost of the demolition, the estimated cost of restoring or stabilizing the building, all other financial information on which the applicant relies to establish financial hardship, and, if the applicant relies on evidence of the lack of structural integrity of the structure, a report on the structural integrity prepared by an engineer licensed in the State of Maryland, based on the engineer's in person observations of the interior and exterior of the structure.
    - a. Costs that are estimated must be supported by written estimates by persons qualified to provide such estimates and in sufficient detail to permit the Commission to verify the reasonableness of the estimate.
    - b. The Commission may find that retention of the structure would cause the applicant financial hardship if it determines that the building has been demolished by neglect or natural disaster and there is no feasible way to restore the building short of rebuilding.

4. Based on the evidence presented in support of any condition contained in Rule 303.B.1, the Commission may continue the meeting in order to obtain access to the property to view the structure, with the property owner's permission, and to allow the applicant or other persons testifying to submit additional evidence.
5. After all interested persons have had an opportunity to speak at the meeting, Commission may endeavor to work out with the applicant an economically feasible plan to preserve the structure. The Commission may pursue this by asking questions of the applicant or others present, and may continue the meeting to allow the applicant and the Commission to pursue possible alternatives to the demolition. The Commission may request assistance from the Department of Planning and Zoning and other parties, public or private, in creating such a plan.
6. If, within 45 days of the initial meeting, no economically feasible plan can be agreed upon, the Commission may act on the application or may, at a public meeting, invoke §16.608(c) of the Howard County Code and grant itself a 90 day period to negotiate with the applicant or other parties in any effort to find a means of preserving the structure.
7. The Commission shall act on the application before the expiration of the 90 day period. Failure to act within this 90 day period shall constitute approval, unless an additional extension of up to 90 days of the negotiating period is agreed to by the Commission and the applicant at a public meeting or the application is withdrawn.

#### **304. Demolition of Other Structures**

- A. If the Commission determines that the structure is not a Structure of Unusual Importance, it shall vote to approve or deny the application based on the standards set forth in §16.607 of the Howard County Code and its adopted Guidelines.
- B. Before taking action on an application, the Commission may ask whether the applicant is willing to have the Commission assist the applicant in trying to develop an economically feasible plan to retain the structure. If the applicant is willing to work with the Commission to try to develop such a plan, the Commission may continue the meeting to allow the applicant and the Commission time to pursue possible alternatives to demolition. The Commission may request assistance from the Department of Planning and Zoning and other parties, public or private, in creating a plan to retain the structure.

**305. Relocation of Structures**

Applications to relocate structures shall be evaluated by the same standards used for demolition. Relocation may be considered as an alternative to preserve a structure that would otherwise be demolished. The Commission shall consider whether the proposed method of moving a historic structure will avoid damage to the structure. An application to relocate a structure shall include a plan showing the location on the receiving property of the relocated structure and its relationship to other on site structures.

**306. Documentation of Structure**

If demolition or relocation of a historic structure is approved by the Commission, the Commission may require that the owner provide opportunity for DPZ staff to document the condition of the structure and its site prior to removal.
